### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael King on 05/19/2009.

The application has been amended as follows.

In the claims:

Claim 24: Page 3, last two lines, delete "without having to move away from the front of housing"

Claim 50: Page 5, last two lines, delete "without having to move away from the front of housing"

Claim 60: Page 7, last two lines, delete "without having to move away from the front of the housing"

Claim 61: Page 8, last two lines, delete "without having to move away from the front of the housing"

Claim 88: Page 10, last two lines, delete "without having to move away from the front of the housing"

### ***Statement of reasons for allowance***

The following is an examiner's statement of reasons for allowance: Patentability seen in, although not limited to independent claims 24, 50, 60, 61 and 88. The

combination of elements specifically claimed including the features of "a data cable having proximal end and a distal end..., a first portion of the data cable extending from the digital video camera and the handle being disposed inside the elongate member". The closest prior art of record does not teach or fairly suggest the claimed features in combination. Prior art, "Lacey (US 2005/0084833)" discloses a surgical training device comprising a practice volume, a simulated laparoscope and digital video cameras disposed inside the practice volume and coupled to a computing device. However, Lacey does not disclose data cable extending from the camera and existing laparoscope handle being disposed inside the elongate member, wherein the data cable has proximal and distal portions and wherein the distal portion is disposed inside the body. Lacey implies that the video camera is coupled to a display device; however it does not disclose a data cable with proximal and distal portions. Applicant's argument regarding the fact that the digital camera disclosed in Petelin's invention could not have been disposed inside the body is also persuasive. Petelin does not disclose a simulated laparoscope. Petelin's invention is a real laparoscope, wherein data are transmitted by optical fibers to a camera which is placed outside the body. In order to place the digital camera of the Petelin's invention inside the body and attach a data cable to transfer the data to display device one would have to make a large incision, which contradicts the fundamental operation of the Lacey's invention.

In addition, the Declaration under 37 CFR 1.132 filed 6/16/2006 and 2/20/2009 is sufficient to overcome the rejection of the claims based upon 35 U.S.C. 103(a) as being unpatentable over Lacey et al. in view of Petelin et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
